Haseeb Javed

Software Engineer — Full Stack Developer — AI Automation Enthusiast

contactimhaseeb@gmail.com — 03272119600 — GitHub — LinkedIn

Professional Summary

Passionate Software Engineer with expertise in modern web development, backend systems, and AI-powered solutions. Experienced in building responsive applications using React.js, Next.js, TypeScript, Python, and .NET technologies. Strong foundation in DevOps practices, Computer Networking, Git workflows, and AI Automation. Focused on creating scalable, user-centric applications while continuously exploring emerging technologies in AI and cloud-native development.

Technical Skills

Frontend: HTML5, CSS3, JavaScript (ES6+), TypeScript, React.js, Next.js, Three.js, GSAP
Backend: Python, Django, Flask, FastAPI, C#, ASP.NET Framework
DevOps & Tools: Git, GitHub, CI/CD Fundamentals, Linux, Docker Fundamentals
AI & Automation: AI Automation, n8n, AI/ML Fundamentals, Prompt Engineering
Networking: Computer Networking, TCP/IP, DNS, HTTP/HTTPS, Network Fundamentals
Other: REST APIs, Responsive Design, Performance Optimization, Software Development Lifecycle

Featured Projects

AI Powered Image Enhancer GitHub — Live Demo

- Developed an AI-powered image enhancement application that improves image quality through intelligent processing.
- Built a modern and responsive user interface with seamless image upload and enhancement workflow.
- Focused on performance optimization and intuitive user experience.

FashiQue – E-Commerce Store GitHub — Live Demo

- Designed and developed a modern e-commerce platform with responsive UI and smooth user experience.
- Implemented product browsing, shopping workflows, and optimized frontend performance.
- Applied modern React development practices and component-based architecture.

MacOS Styled Portfolio GitHub — Live Demo

- Created an interactive portfolio inspired by the macOS operating system experience.
- Implemented advanced animations and immersive UI interactions using modern frontend technologies.
- Demonstrated creativity, attention to detail, and strong frontend engineering skills.

Education

Master's Degree in Islamic Studies Expected 2027
Currently Pursuing

Bachelor's Degree in Islamic Studies 2025
Completed

Additional Information

- Strong interest in Full Stack Development, Cloud Technologies, AI Engineering, and Software Architecture.
- Actively building production-ready projects and continuously learning modern software engineering practices.
- Open to Software Engineer, Frontend Developer, Full Stack Developer, Python Developer, and AI Automation roles.
